

“Dyslexia
is a **L**earning **D**isability
that is **neurobiological** in origin. It
is characterized by difficulties
with **accurate and/or fluent**
word recognition and by **•POOR**
SPELLING and **•DECODING ABILITIES**.
These difficulties typically result from a **DEFICIT**
in the phonological component of
language that is often unexpected in *relation*
to other *cognitive abilities* and the provision
of **•effective•classroom•instruction**. Secondary
consequences may include problems in
•reading •comprehension and **•Reduced**
Reading Experience that can *impede*
growth of **VOCABULARY**
and **background**
knowledge.”
